BRAND DEFINITION · v1.0

Voice Command AI

Brand Definition

Your voice. Every agent. One command center.

Korean slogan · 말로 지휘하고, 흐름을 관리하다.

Issued 2026-10-30 · Design basis: V + voice waveform symbol · Proposed brand guidelines

Voice into commands, sessions in one place

A brand that turns a developer's voice into clear commands and manages the flow of many AI coding sessions from one place.

Core values

- **Clarity**
- **Control**
- **Connection**
- **Openness**

Product status: planning stage. Feature descriptions describe the target experience.

Item	Definition
Brand name	Voice Command AI
Short name · Korean	VCA · 보이스 커맨드 AI
Category	Voice-driven remote control and orchestration tool for AI coding agents
Audience	Developers and teams running many projects, sessions and dev machines at once
Core problem	Keyboard-focus conflicts, resource contention, and the overhead of switching and checking sessions
Brand promise	**Know exactly which session gets which command, then run it.**

Slogan and one-liner

Your voice.
Every agent.
One command center.

Korean slogan · 말로 지휘하고, 흐름을 관리하다.

One-liner

A tool for checking and directing the AI coding sessions on your dev machine by voice, from your phone.

Short, specific, user in control

1. Keep guidance short and specific.
2. Lead with the target, the action and the result.
3. Put the user’s sense of control first.
4. Clearly separate the current state from the choice needed.
5. Claims about security, connectivity or free use only within what is actually built and offered.

03 · Symbol

V, a voice wave, and a center of control

Master · navy background + blue–cyan gradient

1 V / Voice

The first letter of Voice · A V outline opening to both sides

2 Wave / voice signal

The human voice and input signal · Five rounded strokes of varying height

3 Control / center of execution

Many agents' work managed in one place · A rhythm converging on the center

Applications are vector interpretations that illustrate the rules. Final production unifies curvature, spacing and gradient against the master.

Five logo formats

Symbol only

App icon · favicon

Horizontal · symbol + Voice Command AI

App header · web header · documents

Vertical

Covers · promotional

Abbreviated · symbol + VCA

Brand mark in limited width

Reversed

Dark screens · one-color print

Blue on navy, with a touch of cyan

#0361F7

Command Blue

Primary brand color · key actions · one-color symbol

#101B35

Deep Navy

Dark backgrounds · primary text

#00CFE8

Voice Cyan

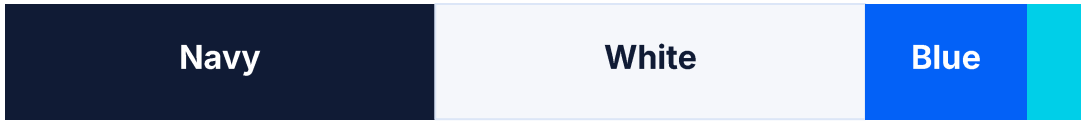

Waveforms · voice input highlights

#F5F7FB

Cloud White

Light backgrounds

Recommended ratio

Navy · white 80% Blue 15% Cyan 5%

- Signature pairing: navy background + blue–cyan symbol
- On light backgrounds, prefer solid blue.
- Never use cyan for small body text.
- Gradient is for emphasis; the solid version is the production default.

Clean sans serifs, mono for code

Use	Typeface	Weight
Korean	Pretendard	Semibold (head) · Regular (body)
English	Inter	Semibold (head) · Regular (body)
Status · figures	Body face of that language	Medium
Code	JetBrains Mono	Regular

Logo lettering is kept at fixed proportions. The original PDF was set in Nanum Gothic for Korean legibility. Where a typeface is not installed, a substitute is shown.

Pretendard

말로 지휘하고, 흐름을 관리하다.

Inter

Your voice. Every agent.

JetBrains Mono

Six backgrounds and one-color pairings

01 Default dark

Deep Navy / Command Blue

02 Light

White / Command Blue

03 Blue reversed

Command Blue / White

04 White one-color

Deep Navy / White

05 Black one-color

White / Black

06 Navy one-color

Light blue / Deep Navy

Safe area and platforms

1024 × 1024 canvas · symbol width ≈ 65–70%

- Place the symbol at about 65–70% of the square canvas.
- Where the OS applies a mask, ship a full square background; don’t pre-cut transparent corners.
- Split Android adaptive icons into foreground and background layers.
- Confirm the final visible area with platform templates.
- Symbol consistency comes before platform-specific shapes.

Source (square)

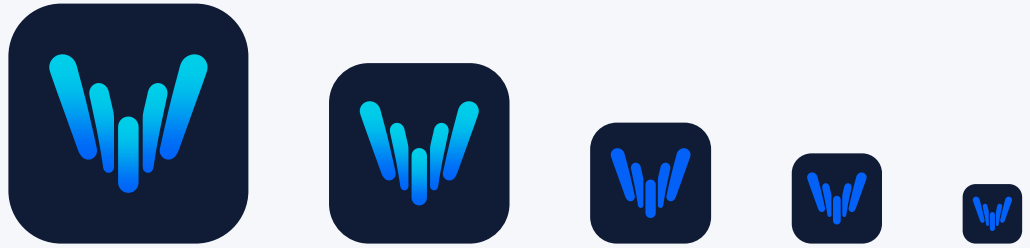

iOS mask

Android circle

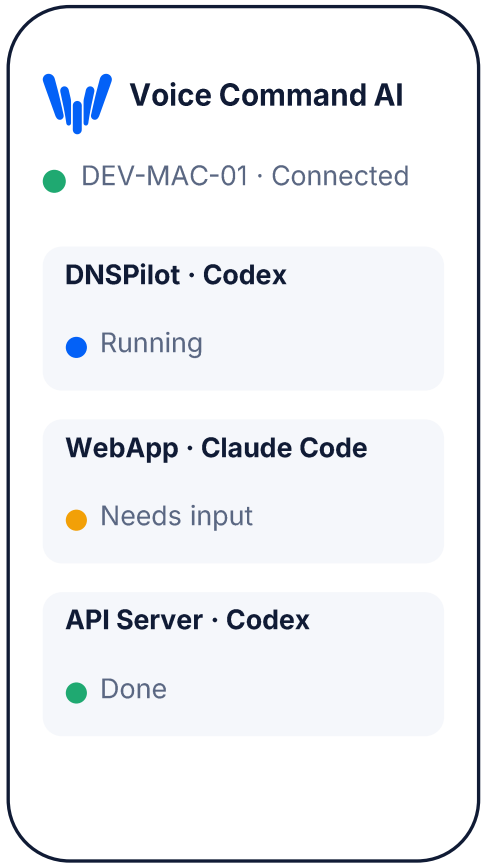

The smaller, the simpler

Item	Standard
Minimum symbol size	24 px
Minimum print size	8 mm
16 px favicon	Separate optical adjustment recommended
Keep when scaled	Five waves and the V outline
Drop when scaled	Gradient · gloss
Review	Check legibility on real devices

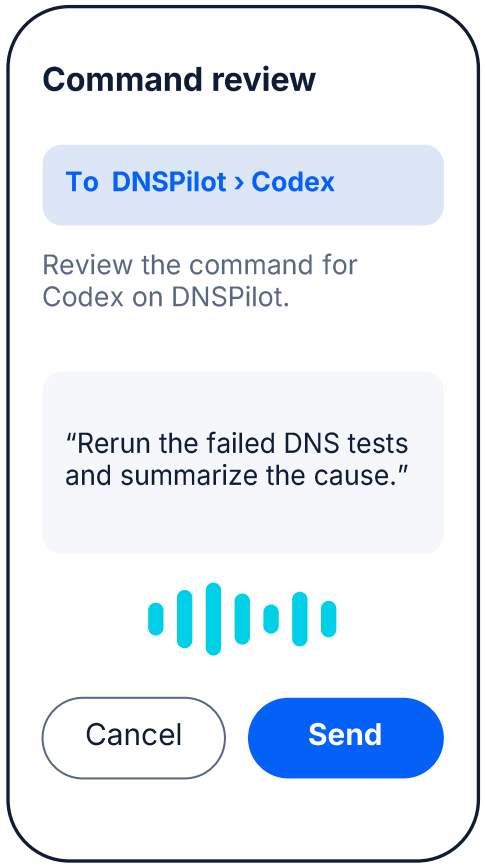

48 px and up: gradient allowed · 32 px and below: solid · 16 px: separate optical version

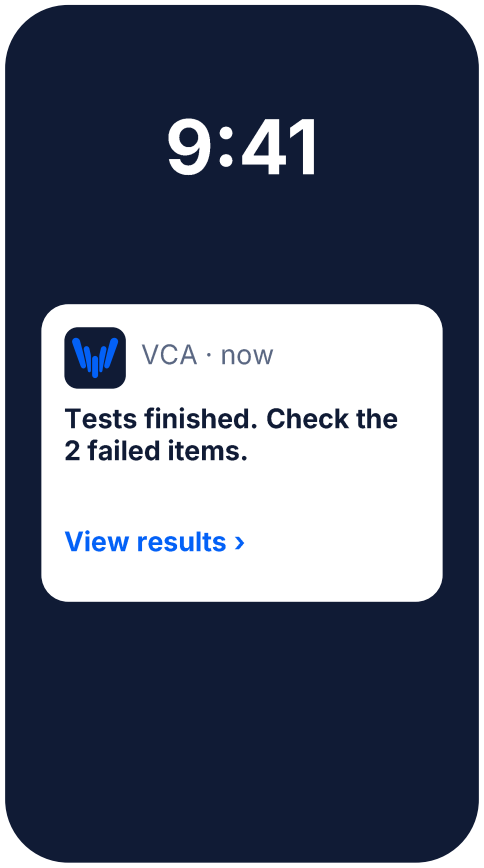

Always show the target first

App header

Voice input · review

Notification

App header

Symbol + Voice Command AI, with machine name and connection status

Voice input · review

Clearly show the target session and project

Notification

Compact icon + task status + action to view results

Connection status

Always pair text with the status indicator

Color shows status, motion shows voice

Status colors

Running
Blue

Done
Green

Needs input
Amber

Error · E-stop
Red

Always show text and icons with color; the logo color never changes with status. Exact status HEX values are not finalized; these are temporary theme values.

Motion

Recording
Wave amplitude shifts smoothly.

Sending
Waves converge once.

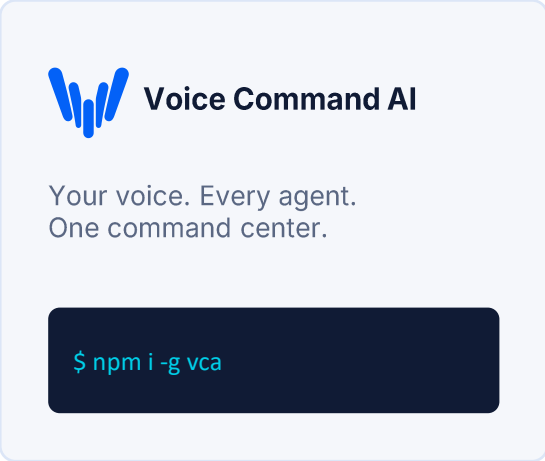

Idle
The logo stays still.

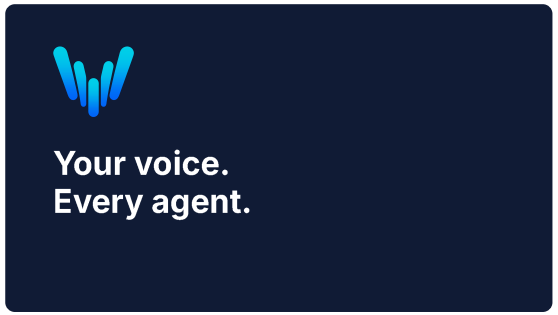

Accessibility
Respect the reduce-motion setting.

Same symbol, same space, everywhere

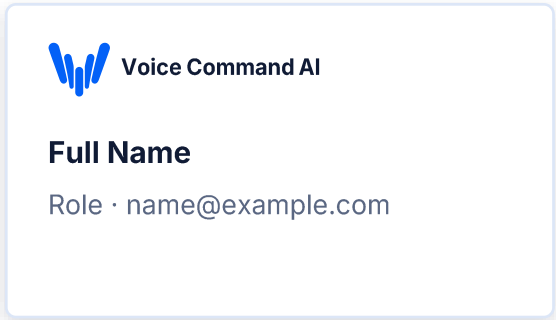

README

Brand name with a short English line

Presentation cover

Logo and slogan with generous space

Business card

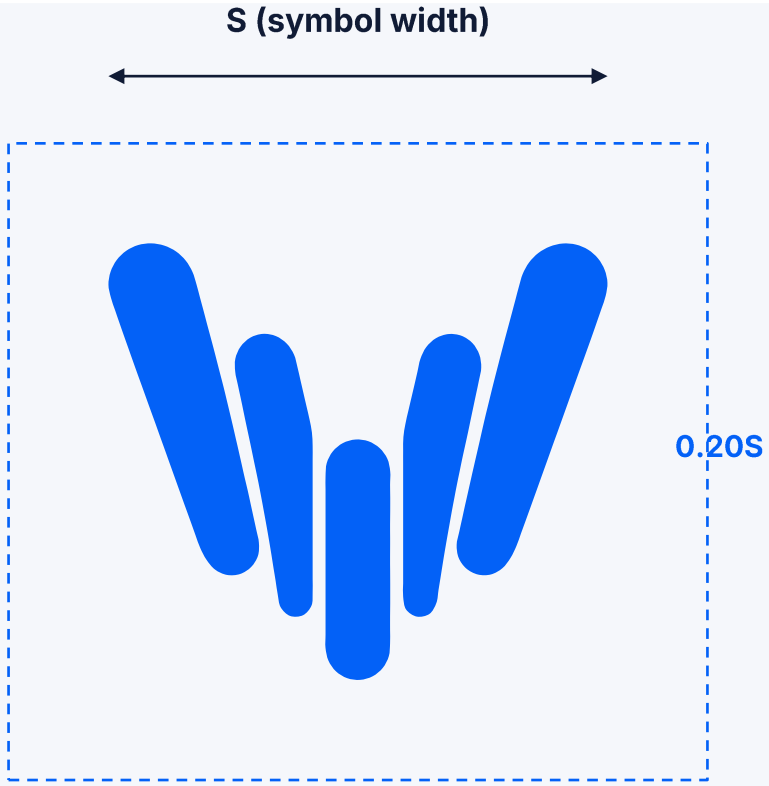

Horizontal logo with name, role and contact

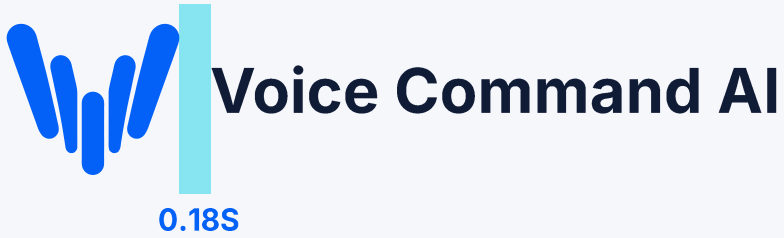

Sticker

One-color symbol or app-icon shape

Clear space, measured in S

- Define the symbol width as S.
- Keep at least 0.20S clear on every side.
- Space the wordmark about 0.18S away, adjusted optically.
- Clear space surrounds the symbol and is distinct from the app icon’s internal safe area.

Never do this

Distort proportions

Rotate

Change wave count

Add outlines

Heavy shadow

Busy photos

Low contrast

Put text inside

Production specs and review checklist

Asset	Specification
Logo	SVG / PDF vector, RGB solid and reversed
App icon source	1024 × 1024 PNG
Platform icons	Exported separately per platform spec
Masters	Separate gradient and solid masters
Print	Convert to CMYK with the output profile, then proof

Review checklist

- [ ] Is it recognizable at 24 px?
- [ ] Is contrast sufficient on dark and light?
- [ ] Are the five waves and V outline intact?
- [ ] Does it respect the OS mask safe area?
- [ ] Does the copy match real product features?
- [ ] Is status shown by more than color?

Voice Command AI

Your voice. Every agent. One command center.

Figures, slogans and applications in this document are proposals. Application mockups do not replace the logo source files; final release vectors and platform icon packages are produced separately.
